

# 5 Reasons to Try\*

**ProV** C&B<sup>®</sup>  
*Temporary Crown & Bridge Material*

Developed using a multifunctional acrylic composite, Pro-V C&B creates a temporary restoration that is a superb mixture of strength, durability, flexibility and esthetics that emulates a natural tooth.

**ery FAST**

Once mixed, Pro-V C&B sets within 4 minutes

**ery SIMPLE**

Pro-V C&B can be applied into an impression with minimal effort as it flows ideally into the impression with great control

**ery ESTHETIC**

Tooth-like translucency and opalescence with a natural fluorescence similar to enamel

**ery STRONG**

Temporary restorations fracture less frequently during removal and re-fitting

**ery VERSATILE**

Suitable for long-term temporaries (>4 weeks) and for demanding anterior temporary restorations
